IMPORTANT INFORMATION

Read these instructions carefully before using this product, paying particular attention to all sections that carry warning symbols, caution symbols and notices. Ensure that these are understood at all times.

WARNING!
This symbol is used whenever there is a risk of personal injury.

CAUTION!
This symbol is used whenever there is a risk of damaging your Lincat product.

NOTE:
This symbol is used to provide additional information, hints and tips.

KEEP THIS MANUAL FOR FUTURE REFERENCE
WARNINGS AND PRECAUTIONS

This appliance must be installed, commissioned and serviced by a qualified person with the installation instructions for the appliance and in accordance with national and local regulations in force in the country of installation.

This appliance is intended for indoor use only and should never be installed outdoors or exposed to the elements of nature. This unit must not be positioned in an area that may be cleaned by a water jet and must not be cleaned by water jet.

The unit should be stood on a solid counter or shelf. Ensure that there is adequate ventilation around the unit. In particular ensure that top and base are clear from obstruction and ensure minimum of 50mm gap around the unit.

Do not install this unit close to any source of heat, which may result in operating condition exceeding its design limits.

Ambient temperature range: minimum 16ºC, maximum 32ºC, Maximum relative humidity 70%.

Switching on: If the unit has been laying on it’s side then allow at least 3 hours in upright position before switching on.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified person.

Ensure that the plug/socket is accessible at all times.

Strip plastic coating and clean the appliance before use.

Do not allow young children, handicapped or infirmed persons to use without supervision.

This appliance contains R134a refrigerant under pressure. No part of unit should be exposed to a naked flame. Maintenance of the refrigeration unit must be carried out by an accredited service provider or qualified refrigeration engineer.

Inform users that certain surface will become hot, especially the draw-off hot tap. Care should be taken to avoid potential injury from burns & scolding whilst operating this appliance.

Always disconnect this appliance before servicing, maintenance or cleaning.

This appliance must be earthed.

Keep these instructions in safe place near the unit for future reference.

INSTALLATION AND COMMISSIONING

This appliance must be earthed.

If replacing the plug connect the terminals as follows:
Green and Yellow wire   Earth   E
Blue wire               Neutral N
Brown wire              Live    L

Install this appliance on a level surface ensuring all vents are unobstructed.

Only install this unit in locations where it can be overseen by trained personnel.

Inlet water pressure should be between 2 and 6 bar. (0.2MPa to 0.6MPa)
If water pressure exceeds 6bar fit a suitable pressure reduction valve.

Ambient air temperature shall be between 16 °C and 32 °C

Electrical supply

The EB3FX/HC is supplied with a 13 amp plug to BS1363.

Water supply connection

Connect the supplied white water inlet hose to the inlet connection point on the base of the boiler and the other end to the mains supply via an accessible isolating tap with a ¾” BSP thread.

Use the hose set supplied with the appliance - any previous hose set is not to be re-used.

Potable water. If solid particles are known to be in the supply, add an extra inline filter or strainer.
Only qualified or trained personnel should use this appliance.

**First Use**
New filters have a small amount of loose, harmless, carbon particles. Drain off approximately 5 litres of water when first setting up or replacing filter.

Switch on the electricity supplies and leave the boiler to fill for 30 minutes. There is a delay of 2 minutes for the chiller to come ‘ON’, this will happen every time when electricity is interrupted.

The unit will display ‘Wait’ whilst it fills and heats/cool. It will display ‘Ready’ when water can be drawn off.
Touchscreen display configuration

When the boiler is supplied timed mode and clock function are all turned off.

To select these options press the “Power button”, select the feature required and follow the on-screen instructions.

To adjust the temperature, clock or to perform a boiler descale press “Ready”, select the option and follow the on-screen instructions.

All units are fitted with a settings PIN lock. Press Ready and then Settings to access the PIN setting screen. Master PIN code is available from Lincat Service should you forget the user set PIN.

Filter Replacement

The filter display shows the estimated life remaining in the filter cartridge. A reminder message is displayed when the filter needs changing.

To replace the filter:

Twist the base of the filter (E) 90 degrees to the left and lower the cartridge out of the appliance. It will contain a small amount of water. Only use a genuine Lincat Filter.

Insert the new filter into the recess and lock in place by twisting to the right.

Press the “Filter life icon” and follow the on-screen instructions to reset the filter life.

Drain off approximately 5 litres of water to remove any loose carbon particles from the filter.

The boiler will not fill if the filter is removed as the filter head incorporates a shut-off valve.

F10-Chiller condenser over heat: This could be due to condenser fan not working, condenser air outlet blocked or condenser blocked.

F11-Chiller clean condenser: This is a regular periodic warning to ensure the condenser fins are not blocked that should be kept clean to ensure optimum operation of cooler water cooling system.
Do not use a water jet or steam cleaner, and do not immerse this appliance.

Clean all panels with warm water and mild detergent and do not use abrasive materials. Dry with a soft cloth.

Slide out and empty the drip tray regularly, and wipe the dispensing tap spout daily to remove limescale deposits.

**DESCALING**

De-scaling is an important maintenance task and must be performed to maintain the warranty.

This range of units has a de-scaling routine built into the software. It guides the user through the process and advises when to open /close valves and when to add the de-scaler.

To decide if the boiler needs a de-scale, whilst wearing gloves carefully remove the blue cap (with the scale dipstick attached) on the top of the boiler.

Allow the water to dry on the dipstick. Where the dipstick has been in the water it will be covered in the same amount of scale as the rest of the tank. When it is about 0.5 to 1mm thick the tank should be de-scaled.

The de-scale routine takes about an hour to complete and the boiler cannot be used during the routine.

Lincat offer a purpose designed de-scaler powder, part number DP10 that can be used should you require it.
SERVICING, MAINTENANCE AND COMPONENT REPLACEMENT

All maintenance and component replacement on this appliance should be carried out by one of our recommended service engineers.

FAULT FINDING

Please refer to the Service Help Desk number on the final page of this manual.

SPARE PARTS LIST

For spare parts for your water boiler/chiller please contact the Lincat Spares department on 01522-875510. Refer to the serial plate for the model and serial number of your water boiler, as this will help us quickly identify the part you require.

For help with the installation, maintenance and use of your Lincat equipment, please contact our service department:

☎ UK: 01522 875520

For non-UK customers, please contact your local Lincat dealer

All service work, other than routine cleaning should be carried out by one of our authorised service agents. We cannot accept responsibility for work carried out by other persons.

To ensure your service enquiry is handled as efficiently as possible, please tell us:

- Brief details of the problem
- Product code
- Type number
- Serial number

All available on serial plate

Lincat reserve the right to carry out any work under warranty, given reasonable access to the appliance, during normal working hours, Monday to Friday, 08:30 to 17:00.

GUARANTEE

This unit carries a comprehensive UK mainland 2 year warranty.

This requires you maintain and care for your product and follow maintenance instructions. If you fail to maintain your unit or damage components Lincat may charge you for a warranty repair.

The guarantee is in addition to, and does not diminish your statutory or legal rights.

The guarantee does not cover:

- Accidental damage, misuse or use not in accordance with the manufacturer’s instructions
- Consumable items (such as filters, glass, bulbs, slot toaster elements and door seals.)
- Damage due to incorrect installation, modification, unauthorised service work or damage due to scale, food debris build-up, etc.

The manufacturer disclaims any liability for incidental, or consequential damages. Attendance is based on reasonable access to the appliance to allow the authorised technician to carry out the warranty work.
